IMPORTANT NOTES:

Standard product in price list

Standard product which is found in the price list will be listed as unbold type in the AMCASE quote.

Standard product modified to customer's request in order to fit space:

Standard product which is modified will be listed as the next higher item number.

Example:

AMCASE offers a 30" wide and 33" wide cabinet, and the client requires a 32" wide cabinet. AMCASE considers this a custom size and will price the cabinet as a 33" wide cabinet on the quote (e.g. AMP06X**33**) and note the cabinet as 32" wide in the width column. Modified items are in **bold** type in the AMCASE quote.

Outside of scope (price list) custom items pricing:

For custom items requested that do not exist in the price list, AMCASE utilizes a standard for calculating the cost. This calculation is based on several variables including: design/engineer costs, additional material(s) cost, and manufacturing costs associated with the modifications. Due to the extent of our product line and the sheer number of possible custom configurations of our casework, it is not feasible to list every possible variation for each cabinet we offer in the price list.

Example:

A client requests a multi-depth locker cabinet (to fit over a support column) with varying size interior cubbies and a custom lock. This request would fall under custom items and be subject to the aforementioned calculations in pricing this cabinet. Custom items would be in **bold** type in the AMCASE quote.

Upcharges:

There is a 10% upcharge for woodgrain finishes. This is noted on applicable AMCASE quotes.

Sink Cutouts:

Sink cutouts are custom, therefore this line item is indicated in **bold** type in the AMCASE quote.

Work surface (HPL) extensions:

AMCASE part numbers go up to 108" wide for HPL work surfaces. However, AMCASE is capable of manufacturing HPL work surfaces up to 144" wide if needed. These extended work surfaces are priced at the 108" wide cost **plus** the additional linear inch price (36" in this case) needed to add up to the total width of the work surface (108 + 36 = 144").

Example:

A job requires a 144" wide HPL work surface. On the quote sheet the work surface is listed as part # AMJ34**108**. The width column is listed as **144"** and the total price would reflect the 108" price + (36" x linear inch price). Therefore, the part # AMJ34108 on the quote would no longer match the price found in the price list because it is an extended HPL work surface.
